

Tomislav Maruščak

As an expert data science consultant and AI engineer with over nine years of experience, I specialize in transforming complex data into actionable insights. My expertise spans across leveraging advanced machine learning techniques, optimizing production planning, and enhancing demand forecasting. With a robust foundation in mathematics and statistics, I have successfully led projects at renowned organizations like Lufthansa Technik and Siemens, driving innovation and efficiency. I excel in designing and implementing end-to-end data solutions, ensuring seamless cloud integration, and fostering team growth through mentorship. I am committed to delivering strategic, data-driven solutions that address critical business challenges, and passionate about staying at the forefront of AI advancements.

Professional Experience

- since 2022 **Lufthansa Industry Solutions, Expert Data Science Consultant** **Berlin, DE**
 Consultant for in-house and external customers in topics like:
- AI-assisted document parsing and indexing (supporting hand-written input too)
 - Demand forecasting, dynamic stock planing, production and logistics optimization in a complex topology setting
 - Consolidate diverse data sources, design workarounds to mitigate data quality issues, and ensure compatibility with existing processes
 - Establish data pipelines, ETL, and MLOps flows on streaming data, and automate manual steps into straightforward data products
 - Design user-friendly dashboards for database access and on-demand model retraining with AI-explainability component
 - Implement user authentication systems and ensure compliance with security standards
 - Define KPIs, select and evaluate models, boost performance of machine learning models, and ensure model robustness against data drift
 - Ensure scalability to guarantee production-readiness at data-product delivery
- Responsibilities include:
- Identify customer requirements, conduct workshops, and conceptualize use cases based on available data and budget constraints
 - Manage teams, ensure timely achievement of milestones and deliverables, and break down data products into smaller, achievable tasks, ideal for delegation to junior colleagues
- 2017 - 2022 **Siemens, Data Scientist** **Vienna, AT**
 Research and development, modelling, reporting and consulting in following areas: customer analytics (comparable customer, churn prediction) • sales analytics • smart sales • BI complex pricing strategies • smart-city platforms • IoT • constraint-based configuraton
- 2020 - 2021 **IMC University of Applied Sciences Krems, Lecturer** **Krems/ Donau, AT**
 Lecturer (part-time) in courses:
 Advanced Statistical Methods for Data Science • Data Visualization • Capstone Project
- 2016 - 2017 **Lufthansa Technik, Data Science Intern** **Hamburg, DE**
 Development of Health Condition Monitoring PoC for Unmanned Aerial Vehicles
- 2016 **University of Vienna, Student Researcher** **Vienna, AT**
 Scientific consulting in the project "C@TS Automated Risk Evaluation System"

Certifications

- 10/2023 **BISO - Business Information Security Officer** **online**
 EXIN Information Security Foundation based on ISO/IEC 27001
- 10/2022 **ACE - Associate Cloud Engineer** **online**
 GCP - Google Cloud Platform

Awards

- 12/2019 **Futureland, Siemens** **Vienna, AT**
 Siemens-internal innovation event
- 5/2015 **Mozgalo, eStudent** **Zagreb, HR**
 Educative students' competition in big data and AI

Education

- Master's degree in Statistics (mag. rer. soc. oec.)** **University of Vienna, AT**
 Faculty of Business, Economics and Statistics
- Bachelor's degree in Mathematics (univ. bacc. math.)** **University of Zagreb, HR**
 Faculty of Natural Sciences - Mathematics Department

 Spanish • C1
 Croatian • native

Technical Skills

Machine Learning & AI
 SQLAlchemy, mlflow, prophet, optuna, deepAR, TimesFM, chronos, caret, scikit-learn, mlflow, optuna, shap, ollama

Programming Languages

Python polars, pandas
R data.table, tidyR
C, C++, Assembler

Cloud Platforms

Azure ML, ARC
SAP BTP, Kyma, Viya
GCP ACE

Database Solutions

Synapse, BigQuery, HANA, PostgreSQL

Data Visualization

Plotly, Dash, Shiny, Highcharter

DevOps & CI/CD

Git, Docker, CI/CD

Statistical Tools

SAS, SPSS, Statistica

Mathematical Tools

Matlab, Julia, Wolfram Mathematica

Operating Systems

macOS, Windows, **Linux** (Ubuntu, fedora, RaspberryPI, openWRT)
