Cover Letter

Dear Hiring Manager,

I am writing to express my interest in the Data and AI Senior Consultant (f/m/d) position at zeroG, as advertised on your website.

With a strong background in data science, machine learning, and AI, combined with a passion for developing creative solutions to complex business challenges, I am excited about the opportunity to contribute to your organization's goal to transform the aviation industry through data-driven products and AI technologies.

I hold a Master's degree in Statistics from University of Vienna, which has equipped me with a solid foundation in mathematics, computer science and machine learning. My technical experience includes working extensively with both R and Python, as well as cloud environments like Azure and GCP. I have a proven track record of designing and deploying AI-based solutions that solve real-world business problems, which aligns closely with your requirements for this role.

In my current role at Lufthansa Industry Solutions, I lead AI and machine learning projects from inception to deployment. This included collaborating with clients to fully understand their business problems, designing AI-based solutions, managing stakeholders and their sometimes conflicting requirements, and leading developers to deliver on sometimes tight project timelines. My experience in building data integration pipelines and cloud solutions has enabled me to turn complex data science prototypes into production-ready data products.

Moreover, due to the current role, I have a strong passion for the aviation industry's unique challenges and opportunities, and I am eager to contribute my skills to help zeroG continue to innovate in this space. I am excited by the opportunity to apply cutting-edge generative AI technologies in this domain, and to further develop my tech skills in that direction. Additionally, my experience with MLOps pipelines and DevOps tools such as Docker and Kubernetes will enable me to contribute to scalable and efficient AI solutions at zeroG.

I am particularly drawn to zeroG's approach in standardization and streamlining of data projects. I am confident that my technical expertise, consulting experience, leadership skills, and the fact that I'm already well networked within the LHG, will allow me to add value to your company and drive impactful outcomes for your clients – which I could possibly already be quite familiar to me.

Thank you for considering my application. I am eager to discuss how my experience and skills can contribute to zeroG's future success and would welcome the opportunity for an interview. I look forward to hearing from you.

Sincerely,

Tomislav Maruscak
