Subject: Recommendation Letter for Data Scientist

To whom it may concern,

It is Alessandro D'Alconzo writing; I am a senior data scientist and a team lead at Siemens Austria. I had the chance to work with Mr. Maruscak, and I am glad to recommend him as a data scientist.

Our collaboration goes back several years. It started off as me hiring him as internal consultant, and over time I managed to convince him to become a member of my data scientist team. Tomislav is an experienced data scientist with a solid mathematical background, and he handled a variety of data related tasks with ease. He has a strong customer orientation and was able to approach even the most challenging customers helping them to identify their real business needs and translate them into technical requirements for data driven use-cases. His unique sociable personality made working together a pleasure, even under pressure and in difficult circumstances. I could always count on him not only to finish tasks on time, but also to proactively research for novel methods, approaches, frameworks, and use that knowledge to suggest new ideas and materialize them into PoCs.

Tomislav is a responsible worker, and I never doubted any task I trusted him with, which makes him an asset in any company he decides to join in the future. I am pleased to offer him this recommendation, and I am confident he will continue his steady profession growth in your company.

Kind regards,
Dr. Alessandro D'Alconzo
